Certificate of Veterinary Inspection

Owner			
Address	City	State	Zip
Bull Visual ID(s)			

- The bull(s) are visually free of active ringworm lesions and warts.
- The bull(s) have two testes with normal positioning, shape, and tone by palpation.

Vaccinations and boosters must be completed at least 14 days and no more than 30 days prior to delivery to the station. Out-of-state bulls must pass all health requirements for cattle imported into Michigan and be accompanied by an official interstate health certificate including individual identification.

See MIbulls.com/consignors for a list of vaccine products that fit these criteria.

At least 1 dose as modified-live vaccine

	Date	Date	Product name
Bovine Rhinotracheitis (IBR)			
Bovine Virus Diarrhea (BVD) <i>(must include types 1 & 2)</i>			
Parainfluenza₃ (PI₃)
